

EQUIPMENT GRIPS MATERIALS
SMOOTH TOUCH,
LIGHT WEIGHT,
SLIPLESS and ODORLESS

Use our indigenous composition and have given a special focus to feeling when touched with hands. There are light weight and odorless than rubber.

EQUIPMENT GRIPS MATERIALS

SMOOTH TOUCH, LIGHT WEIGHT, SLIPLESS and ODORLESS

These grips are manufactured using TPE injection molding. Both functional and aesthetically pleasing, they can be manufactured in a wide range of colors, and their texture and feel can also be adjusted. They are made of TPE, so they are almost odorless, without the disagreeable smell of rubber. The displayed product was made with the concept of creating a golf grip that clings tightly to a player's hands.
