

AUTOMOBILE MATERIALS
WIDE-RANGING
QUALITY AND COSTS
NEEDS OF CUSTOMERS

**Design and manufacture automobile interior and exterior materials.
Which can be manufactured with lower costs with our technology.**

AUTOMOBILE MATERIALS

WIDE-RANGING QUALITY AND COSTS NEEDS OF CUSTOMERS

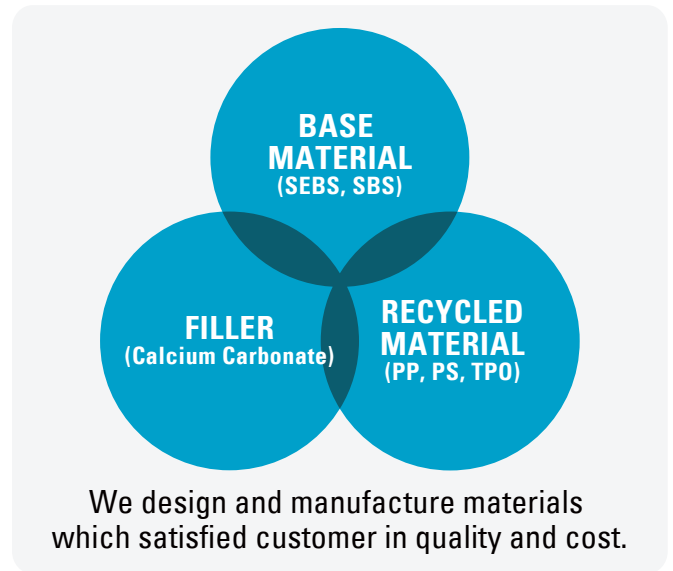

These materials match the specifications of individual automobile manufacturers. Our primary goal was to meet the wide-ranging quality and cost needs of customers. Their composition is adjusted based on customer molding conditions, texture needs, and hardness requirements. Recycled material can also be used to achieve lower costs. We have a track record of manufacturing for various major automobile manufacturers and have large manufacturing lines for handling high volume orders.

DATA SHEET

Property	Unit	Value
Hardness	Shore A	72
MFR	g/10min (374°F 11Lbs)	22.015
Density	lbs/ft3 (g/cm3)	0.00065 1.063
Tensile strength	Mpa	4.57
Percentage elongation	%	650
100% modulus	Mpa	2.55
Tear strength - longitudinal	kgf/cm	6.2
Tear strength - lateral	kgf/cm	24.9

STRUCTURE

CUSTOMIZE ELASTOMER We can customize elastomer that suits your favor.
